MX24 Water Systems Owners Manual

This Data sheet is advisory notes and please read the manufacturers manuals if available for full operating instructions. Please remember that you are on a boat without a direct water feed so use water sparingly to avoid constant filling of water tank.

Water tank filling point for the 107lt holding tank can be found on the back deck.

If pump continues to run when not using water, please switch of at panel immediately and re fill water as empty.

See below. Please note you cannot over fill as it will just flow back to filler and overflow outside.

MX24 Water Systems Owners Manual

Switch on 12v at wall panel marked (MACERATOR) This will switch on auto flush.

Please note this is a cassette toilet and unlike a domestic toilet as will flush into small holding tank which can be found in hatch on back deck.

To use push GREY lever to right and return to the left after.

Please also note this will swivel for comfort and position.

Please be frugal with flush and always best to use the comfort of the marina facilities, both loo and shower.

To empty cassette, please refer to manufacturer's owners guide.
